

Our Business Transformation Towards Sustainability

The impending threat of climate change has underscored the importance of fostering sustainability in our society. Businesses are being urged to adopt eco-friendly practices to promote sustainability in the workplace, and at Enterprise Outsourcing, we have taken proactive steps to implement innovative measures toward this goal.

Water-Based Air Conditioning

To minimize waste and reduce our carbon footprint, we have installed water-based air conditioning systems throughout our offices. These systems utilize a robust filtering mechanism that recycles water to cool the air, eliminating the need for excessive electricity consumption. By partnering with local manufacturers, we not only support our local economy but also ensure sustainability in our operations.

Digital Office Solutions

Embracing digitalization, we have implemented various solutions to reduce paper usage and enhance efficiency. Our team servers facilitate seamless project collaboration and document sharing, eliminating the need for printed materials. Additionally, our in-house digital solution, *HRArtis*, streamlines HR processes, significantly reducing paper wastage and promoting a greener workplace.

Efficient Lighting

Recognizing the wastage of electricity caused by unnecessary lighting, we have installed motion sensors in all our boardrooms and bathrooms. These sensors activate lights automatically when movement is detected and deactivate them when there's no activity, thereby minimizing energy consumption and promoting sustainability. LED lighting further enhances energy efficiency and reduces our carbon footprint.

Device Management

To further reduce electricity usage, we have implemented a policy of switching off all computers and laptops overnight. This not only conserves energy but also extends the lifespan of our devices. By safeguarding our devices from power surges during power cuts, we ensure their longevity and contribute to sustainable practices.

Innovative Sustainability Solutions

Small changes can make a significant impact, which is why we have adopted reusable mugs, stainless steel utensils and water bottles in our offices. By minimizing waste and promoting reuse, we contribute to reducing landfill waste and conserving resources. Our coffee machines, sourced from local vendors, eliminate the need for paper filters or plastic pods, further promoting sustainability.

Employee Initiatives

We encourage our employees to embrace sustainable practices in their daily lives. Many of our team members utilize public transport or carpooling to reduce their carbon footprint during their commute. By

fostering a culture of sustainability among our employees, we promote environmental consciousness both inside and outside the workplace.

At Enterprise Outsourcing, we are committed to creating a sustainable work environment and minimizing our environmental impact. Through the implementation of green initiatives and the promotion of eco-friendly practices, we strive to lead by example and inspire positive change in our community. Together, we can build a greener, more sustainable future for generations to come.
